

Store Classification and Shelf Capacity Reference

Document: MRG-REF-002 | Version: v1.0 | Effective: March 1, 2026 | Last reviewed: February 15, 2026

Purpose

This reference defines the 10 retail locations (Store IDs 1 through 10) used across sales, inventory, and forecasting systems, along with each store's format tier and maximum on-shelf stock capacity per item. Reorder quantities recommended for any store must never exceed the capacity limit defined here, regardless of forecasted demand.

Store Reference Table

ID	Store Name	Format Tier	Max Stock / SKU	Notes
1	Downtown Flagship	Large Format	400 units	Full assortment, all categories
2	Westfield Mall	Large Format	400 units	Full assortment, all categories
3	Riverside Plaza	Large Format	400 units	Full assortment, all categories
4	Northgate Center	Standard Format	200 units	Full assortment
5	Eastside Commons	Standard Format	200 units	Full assortment
6	Lakeview Crossing	Standard Format	200 units	Full assortment
7	Southpark Junction	Standard Format	200 units	Full assortment
8	Uptown Express	Small / Express	80 units	Limited shelf space, fast movers only
9	Harbor Point Express	Small / Express	80 units	Limited shelf space, fast movers only
10	Metro Transit Express	Small / Express	80 units	Limited shelf space, fast movers only

Format Tier Definitions

Large Format stores carry the full assortment with the highest per-SKU capacity and are the default location for new item launches. **Standard Format** stores carry the full assortment at moderate capacity. **Small / Express** stores carry a curated fast-moving subset only; capacity constraints here are the most common reason a system-recommended reorder quantity must be reduced before approval.
